Study Guide for Psychology in Modules

Although the average college student spends only between 15 and 18 hours in class in any given week, increasing the amount of free time, there is a correlating increase in the workload. Many college students never learned effective study habits in high school and believe they will be able to make it through college just as easily. However, college and university professors and administrators claim that studying is directly connected to a student's ultimate success or failure. By reading *101 Ways to Make Studying Easier and Faster for College Students*, you can improve the effectiveness of your studying. After all, effectiveness is not measured by the length of time spent studying or blankly staring at a textbook but by the level of comprehension. In this new book, you will learn how to make a study schedule, how to design an effective study environment, how to read for comprehension, how to get organized, how to find your learning style, how to take notes during lectures, how to listen better in class, how to use reference sources, how to boost your concentration, how to stay motivated, how to review and edit your notes, and how to increase reading comprehension. You will learn effective note taking strategies, where to study, when to study, time management skills, strategies for reading novels and text books, memorization techniques, and organizational skills. Additionally, you will find out how to stay awake while studying, how to change your current habits, and how to make studying more enjoyable. We will provide you with various studying methods, including flashcards, quizzes, summarizing, outlining, answering study guide questions, and the proven SQ3R method, as well as exercises to help improve your skills. Furthermore, *101 Ways to Make Studying Easier and Faster for College Students* is full of tips from students just like you, as well as professors. No two people learn the same way, and no one study method will work for everyone. While this book introduces you to different study methods, the aim is to improve your learning, your understanding, and, ultimately, your grades. HiSET Exam Prep

Most new psychology instructors enter their first undergraduate classrooms with little or no formal preparation for their role as a teacher. The goal of this book is to review the body of teaching research that is available as well as some of the well-accepted lore, so as to make the first foray into teaching psychology a positive experience. *Teaching Psychology* outlines the major problems and issues confronting psychology teachers. It presents an overview of the "nuts and bolts" of teaching psychology including dealing with troubled and troubling students, choosing and using technology, developing evaluation instruments, and selecting methods for self-evaluation. Written by two award-winning psychology professors with over 50 years of combined teaching experience, the book offers a wide range of down-to-earth suggestions and immediately usable materials intended to help psychology teachers teach better and help students learn more. The chapters are organized to roughly parallel the sequence of tasks that new psychology teachers face, beginning with goal setting and ending with evaluation of one's teaching. Each chapter is chockfull of helpful tools including checklists, sample lecture notes, writing assignments, and grading criteria. To make it easier to customize this material, these tools are available on an accompanying CD along with a rating sheet for choosing a textbook, a student grade-record sheet, a sample statement on academic integrity and a pool of less-than-perfect test items to hone item-writing skills. This book offers guidelines for teaching such as: setting goals in line with 10 basic principles of effective teaching planning the basics including choosing a text, writing a syllabus, and creating a grading system setting a positive tone in the classroom providing tips on asking and answering questions, promoting critical thinking, and evaluating student performance. Intended for psychology graduate students who are learning to teach, faculty who train psychology instructors, and new psychology faculty at institutions ranging from high schools to universities, as well as experienced faculty wishing to hone their teaching skills.
